A Cohesive Strategy for UK Repository Shared Services

Bringing together key UK repository services to deliver a connected national infrastructure to support open access

Repository Shared Services Project

CORE
http://core.kmi.open.ac.uk
Aggregation of metadata and open access content from repositories and journals.

OpenDOAR
http://www.opendoar.org
The world’s authoritative and quality-assured directory of Open Access repositories.

IRUS-UK
http://www.irus.mimas.ac.uk
The Institutional Repository Usage Statistics service collects raw download data from UK IRs and processes into COUNTER-compliant, comparable, authoritative, standards-based usage statistics.

RIOXX
http://rioxx.net
Metadata profile allowing institutional repositories to share information about OA research papers and their compliance with funder policies.

V40A
http://v4oa.net
Vocabularies for Open Access is a set of vocabularies to describe relevant features of OA papers, including version, licence, readability, APC status and embargo.

SHERPA FACT
http://sherpa.ac.uk/fact
Advice to UK authors on compliance with funder’s policies in their journal of choice.

SHERPA JULIET
http://www.sherpa.ac.uk/juliet
Registry of Open Access policies from research funders worldwide.

SHERPA RoMEO
http://www.sherpa.ac.uk/romeo
Analysis of publisher policies for authors’ rights when using Open Access repositories.

Jisc Publications Router
http://broker.edina.ac.uk
Automates direct delivery of scholarly works from multiple suppliers (such as publishers or subject repositories) to the appropriate individual repository.
